Hazard frequencies and consequences

Hazard type	Frequency of occurrence	Consequence		
		Area affected	Losses and damages	Impact on Population
Drought	Extremely high	Very high	High	Very high
Landslide	Extremely high	High	Significant	Significant
Floods	Very high	Very high	Very high	Very high
Cyclone	High	Very high	Very high	Very high
Tsunami	Rare	High	Extremely high	Very high
Earthquake	Rare	Significant	Significant	Significant
Animals/ insects	High	Significant	Significant	Significant
Coastal erosion	High	Significant	Significant	High
Tornadoes, lightning strikes and severe thunder storms	Very high	High	Significant	Significant
Pandemic, Epidemic	Very high	Very high	High	High
Industrial hazard	Significant	Significant	Significant	Significant
Forest fire	Significant	Significant	Significant	Significant
Chemical accident	Significant	Significant	Significant	Significant
Oil spills including inland and marine oil spills	Rare	Significant	Significant	Significant

Source: Desinventar, NDMP – 2013-2017

Regional level natural catastrophe – Flood

Total land area – 14035 sq.km
(country total 65610 sq.km)
Total population – 10.2 million
(country total 22.16 mil)

Worst case scenario

Province	Districts	No of persons affetced
Western	Kalutara	1.3 mil
	Colombo	2.8 mil
	Gampaha	2.3mil
Southern	Galle	1.1 mil
	Matara	0.85 mil
	Hambanthota	0.6 mil
Sabaragamuwa	Kegalle	0.84 mil
	Ratnapura	1.1 mil

Factors to be considered

- Number of safety centres needed
- Number of boats required for evacuation
- Food, water and sanitation requirements
- Housing needs
- Health facilities especially for old people, patients, children and pregnant women
- Service personnel need

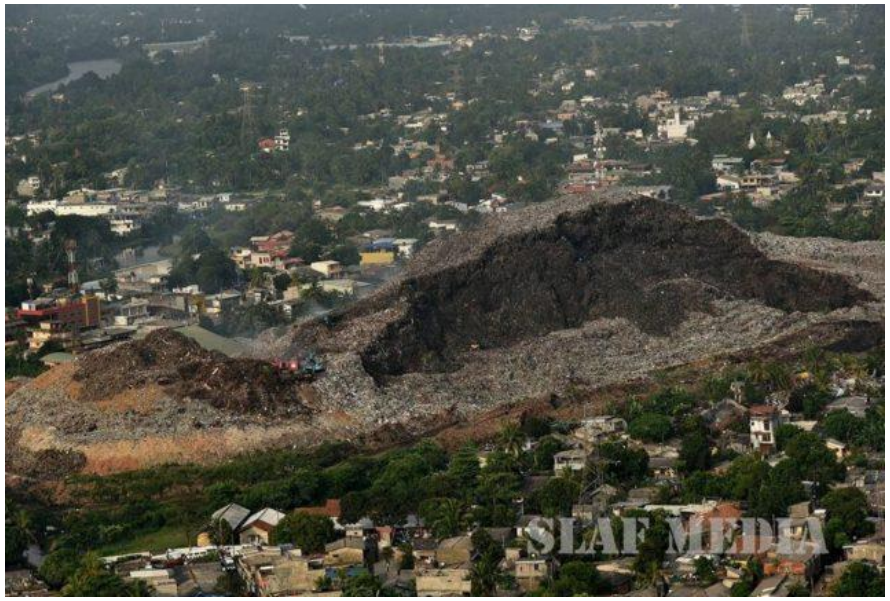

Lessons learned and expereineces

Need of

- Maintaining and operating **Early Warning Systems.**
- Dissemination of early warning messages and **ensure the receipt at remote vulnerable villagers**.
- Strengthening the coordinating mechanism on warning dissemination related activities from the top to bottom levels.
- Prior identification of locations for establishing safety centres and other facilities
- Prior allocation of financial resources for emergency situations
- Preparedness for sudden and timely responses for emergencies

Man made catastrophe
Garbage mound collapse

- A Massive garbage mound collapsed in 2017 in Meethotamulla, near Colombo, Sri Lanka
  - 29 people lost their lives
  - 175 Injured(approximately)
  - 1700 persons lost their houses

Lessons learned

- Negligence of human health and haphazard way of waste disposal mechanisms

- Prompted discussions on waste management and urban planning in Sri Lanka.
